

**TURNING HEADS - 10 WATT**

Audio Amplifier  
Model: SFX 102

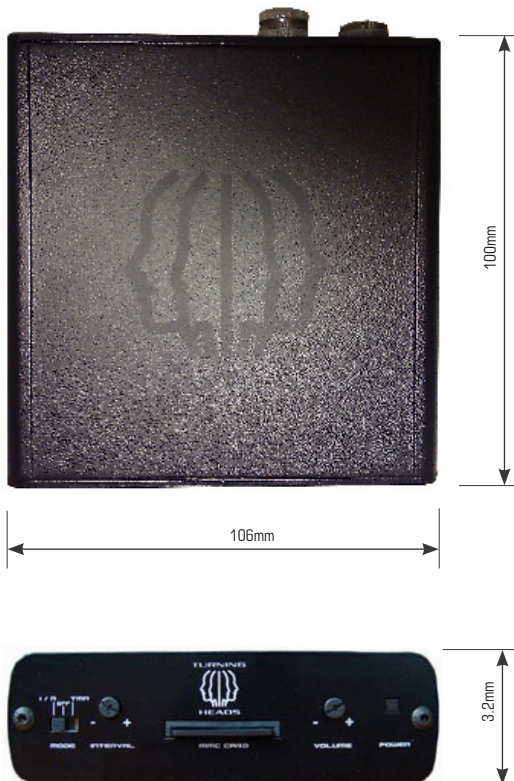

Turning Heads provides the user with a complete audio solution capable of producing high quality sound, with numerous possible applications. Used in conjunction with SFX Gel Audio speakers, it can be used wherever sound is required to provide information or draw attention to promotional displays. The unit has the ability to either, store audio information on Multi Media Cards utilising MP3 format, or an audio in socket that allows it to stream music from a PC or Hi-Fi source. The audio message can be activated by an on-board timer, infra red sensor or a variety of switches.
