

ACTIVE AUDIO - 10 WATT

Active Audio Signage
Model: SFX

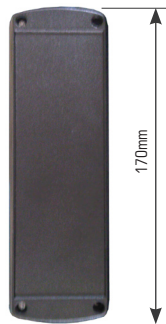

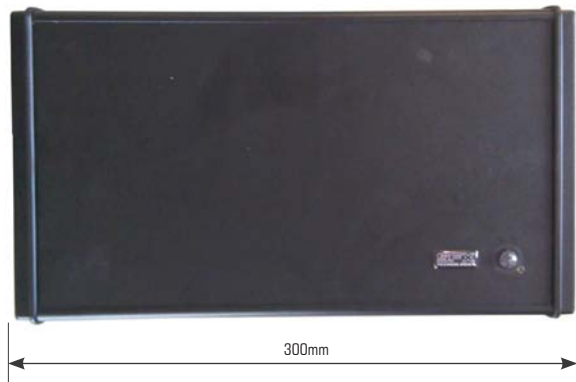

Active Audio Signage provides the user with a complete audio solution capable of producing high quality sound, with numerous possible applications. Used in conjunction with SFX Gel Audio speakers, it can be used wherever sound is required to provide information or draw attention to promotional displays. The unit has audio messages stored on Multi Media Cards utilising MP3 format. The audio message can be activated by an on-board timer, infra-red sensor or a variety of switches.
